

Nagarjun Phalghat Ravi

AI Engineer

Dynamic AI Engineer with expertise in Generative AI, LLMs, Agentic systems and AI-driven automation. Proficient in prompt engineering, API integrations, RAG systems, and workflow optimization, with hands-on experience in Stable Diffusion, LangChain, LangGraph, ComfyUI, and Azure. Passionate about contributing to innovative AI solutions within collaborative teams.

WORK EXPERIENCE

AI Engineer

Mercedes-Benz AG

10/2024 - Present

Stuttgart, Baden-Württemberg

- Designed a **production-oriented RAG** knowledge assistant for internal users, enabling teams to query Confluence, Jira, uploaded documents, and image-derived content with grounded answers and **source citations**.
- Built core backend logic for ingestion, chunking, embeddings, FAISS retrieval, prompt orchestration, **multi-LLM routing**, and citation-based answer generation.
- Designed **multi-agent AI** workflows using specialized agents, supervisor orchestration, tool/function calling, memory/state handling, and retrieval-augmented context.
- Developed **Knowledge Graph / GraphRAG** retrieval combining entity-relation extraction, graph-aware search, vector retrieval, and LLM-based answer generation.
- Dockerized and deployed** frontend/backend AI services on **Azure** using ACR, environment secrets, logging, monitoring, and **GitHub Actions CI/CD**.
- Built **ComfyUI**-based automotive GenAI workflows using SDXL/FLUX, ControlNet, segmentation, depth/edge conditioning, **LoRA** and **DreamBooth** experimentation.
- Research & Optimization:** Reviewed research papers on **Stable Diffusion** and **LDMs** to gain insights into model architectures and image generation.
- Presented **GenAI** systems, benefits, and workflows to **business stakeholders**, translating complex AI capabilities into practical enterprise use cases.

Project Engineer

Wipro Ltd

09/2021 - 09/2022

Bengaluru, India

- Data Analysis and Decision-Making:** Leveraged **Python** and **Pandas** to analyze cloud data, providing actionable insights for strategic decision-making.
- Developed and optimized **Azure Data Factory** pipelines and **Azure DevOps** workflows, improving data processing efficiency by 20%.

EDUCATION

Master of Computer Science(Artificial Intelligence)

Brandenburgische Technische Universität

10/2022 - Present

Cottbus, Germany

Bachelor of Engineering | Computer Science

JSS Science and Technology University

10/2017 - 08/2021

Mysuru, India

TECHNICAL PROFICIENCY

AI / GenAI: LLMs, RAG, LangChain, LangGraph, LangSmith, AI Agents, Multi-Agent Systems, GraphRAG, Prompt Engineering, Tool Calling, MCP

Backend & Deployment: Python, FastAPI, REST APIs, Docker, GitHub Actions, CI/CD

Cloud: Microsoft Azure, Azure App Service, Azure Container Registry, Azure Data Factory, Azure DevOps, Azure OpenAI

Retrieval & Data: FAISS, Embeddings, Vector Search, Pandas, NumPy, SQL

Visual GenAI: ComfyUI, SDXL, ControlNet, LoRA, DreamBooth

Tools: Git, GitHub, Cursor, Claude Code, GitHub Copilot, Codex, n8n

PERSONAL PROJECTS

Multimodal RAG Based Medical Chatbot

- Overview:** Developed an advanced medical chatbot using LLMs to provide accurate and **context-aware** responses for medical inquiries.
- Technologies:** Llama3, Python, Hugging Face Transformers, Streamlit, LangChain, Scikit-learn.
- Outcome:** Successfully created a chatbot capable of handling diverse medical queries, enhancing patient support and reducing the need for human intervention by 50%.

Multi-Agent AI Assistant Platform

- Overview:** Developed a production-grade autonomous AI assistant framework with **multi-agent orchestration** using **LangGraph**, enabling dynamic task delegation, **tool execution**, and long-term memory across multiple channels (Web UI, Telegram, Discord, REST API, CLI).
- Technologies:** Python, LangGraph, FastAPI, OpenAI API, Anthropic API, ChromaDB, Docker, REST APIs.
- Outcome:** Built a scalable, plugin-based AI platform supporting multi-agent workflows, **hybrid RAG memory**, and **tool automation**, deployed locally via Docker, demonstrating production-ready agent orchestration and system design.

Personalized Career Coaching LLM (Fine-Tuning)

- Overview:** Fine-tuned **LLaMA-3** on curated job descriptions, career guides, and interview transcripts, integrating **RAG** for tailored skill paths, portfolio ideas, and interview prep. Deployed via **Docker** on Azure for scalable access.
- Technologies:** Python, LoRA, LangChain, FAISS, Hugging Face Transformers, Docker.
- Outcome:** Delivered an AI system providing personalized skill-building plans, portfolio project suggestions, and interview preparation, reducing job search readiness time by 50%.
